

Quality policy

Our main goal is to build trust and meet the needs and expectations of our Customers. Quality Policy is implemented by:

- determining Customers' requirements and their proper fulfillment,
- effective implementation of new products for aviation industry,
- guaranteeing stable quality of products,
- qualification and evaluation of suppliers able to meet Customers' requirements,
- supervision of the production process and measurement of the conformity of the product,
- improving the qualifications of the personnel and modernizing the machinery together with the measurement equipment to meet the Customers' requirements,
- compliance with statutory and legal requirements,
- systematic analysis of the results of operations conducted during the Management Review and taking proper action in case of risk or failure of achieving the planned results.

The implementation process standards of the Quality Policy is the satisfaction of our Customers. The policy is appropriate to the context of Bernacki Industrial Services Sp. z o.o., a company focused on international operations in the field of machining services for general and aviation industry.

We are committed to meeting the requirements and continuously improving the effectiveness of the Quality Management System in accordance with the requirements of ISO 9001: 2015, AS 9100 rev. D.

This Quality Policy applies to all employees of Bernacki Industrial Services Sp. z o.o.
